Choose The Name You Can Trust

Crystal Cove Spas' vision is to grow by forming a network of the best independent distributors to provide exceptional customer service while increasing our value as a trusted growth partner to top manufacturers in the industry. Our mission is to help our family of companies achieve new heights and provide opportunities for all employees to grow, thrive, and advance with the company for decades to come.

Superior Craftsmanship Isn't a Luxury; It's a Standard

At Crystal Cove Spas, we are passionate about delivering products that exceed our customers' expectations. With an unwavering focus on quality, we meticulously craft each product and subject it to rigorous testing to ensure it meets and surpasses the highest industry standards. We take great pride in our commitment to excellence and stand behind every product we create, knowing that it has been expertly crafted with the utmost attention to detail.

Customers Come First

We have worked tirelessly to establish and maintain our reputation, and we remain dedicated to upholding it. At Crystal Cove Spas, we take pride in standing behind the superior quality of our products and providing unwavering support to our dealers. Our commitment to ensuring customer satisfaction is the driving force behind everything we do, and we will continue to work diligently to maintain the trust and confidence of our valued partners.

SHELL CONSTRUCTION

Crystal Cove Spas applies precision engineering to every hot tub, ensuring the highest quality home resort experience. With premium materials, advanced features, and masterful craftsmanship, our hot tubs deliver the performance, durability, and luxury you deserve for relaxation, unwinding, or entertaining guests.

The Strongest, Most Durable Spa Shell in the Industry

Our industry-leading manufacturing process vacuum-forms high-quality acrylic sheets before they are reinforced. Each tub then undergoes a curing process before its shell is reinforced with supports and angled irons that are added to for maximize stability.

Pressure Treated Cabinet Frame

Heritage Supply Group's specially-designed cabinet frames are treated to resist rot, corrosion, and invasive pests and insects. Our American-made Pressure Treated Cabinet Frames are constructed using 1-inch galvanized steel fasteners, corner gussets, and vertical angle bracings for added beam support.

Recycled Denim Insulation

Denim insulation provides an exceptional alternative, with many benefits unique to itself: it is Low density and better reduction of thermal energy. Low density materials are chosen to insulate our spas because they resist thermal transfer.

INSULATION

Crystal Cove Spas takes insulation to the next level in our hot tubs. Our innovative insulation technology ensures exceptional energy efficiency, maintaining optimal water temperature while minimizing heat loss. Experience superior comfort and savings with Heritage's advanced insulation system.

Peace & Quiet

Whether you choose to soak in soothing silence or with your own relaxing playlist via one of our available spa speaker systems, you'll do so while your tub churns and heats the waters in whisper-soft silence.

Better Freeze Protection

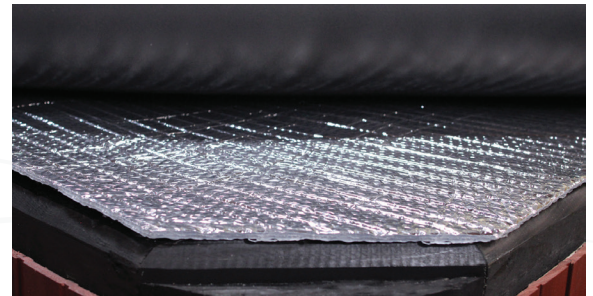

Crystal Cove Spa's design technology protects the integrity of both tub and operating components in an efficient, environmentally-friendly way.

Maintenance and Service

Thermo-Shield™ equipped spas don't just stay warmer, they're also easier to perform maintenance on compared to conventionally insulated spas.

Thermo-Shield™

Thermo-Shield™ utilizes environmentally-friendly technology to keep the soothing heat of your tub's waters locked in at all times. First, a 3" thick insulation material comprised of post-consumer recycled denim is thermally bonded with a 99% pure aluminum reinforced foil sheet creating a radiant heat shield. This technology directs the system's residual heat back into the spa for increased heating efficiency. A dual-walled layer of reflective bubble foil is installed under the spa's floor to reflect ambient heat upward throughout the tub. Lastly, a unique thermoplastic polymer liner locks in heat while keeping external moisture out.

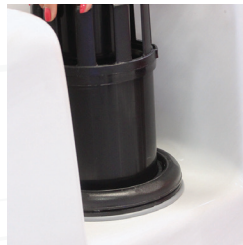

Thermo-Layer™ Floor Insulation

- Our specially designed, added layer of insulation keeps cold out and retains heat
- Temperate layers reflect heat back into the spa —not away from it
- Prevents temperature from cold cement subfloors from reaching the spa waters

HYDRO CLEAR FILTRATION

Crystal Cove Spas offers advanced and industry-leading water filtration and cleaning systems that ensure your hot tub stays in immaculate condition. Our cutting-edge systems are designed to provide the highest level of water clarity, purity, and cleanliness, so you can enjoy a safe and hygienic spa experience every time you soak. Whether you're relaxing after a long day or entertaining guests, our superior water filtration and cleaning technology gives you peace of mind and ensures that your spa is always ready when you are.

Bio-Clean™ Antimicrobial Filter with TeleWeir Gate

Filters are designed to be both easily accessible and to allow for balanced filtration. A special antibacterial agent within the fabric of each Crystal Cove Spas filter helps to ward off growth of microbes and bacteria. A TeleWeir Gate prevents debris from re-entering the spa's water system. When you choose a Crystal Cove Spas tub, the days of fumbling for awkwardly placed filters and navigating complex chemical balances are over. In fact, managing the waters of your tub is almost as stress-free as easing into it.

Our Hydro Clear™ Ozone Purifiers Will Keep Your Spa Clean and Fresh!

Hydro Clear™ Ozonator

The hydro clear ozone™ is a small, compact low power consumption unit producing a powerful oxidant, eliminating contaminants and toxins in water. The hydro clear ozone™ is a low power consumption unit (120V or 240V) that operates at a relatively cool temperature. The hydro clear ozone™ disinfects water by killing viruses & biological contaminants allowing for a reduction of chemical levels eliminating discomfort of skin and eye irritations. This unit was specifically designed and tested for spa applications and is UL/cUL, CE & AS/NZS certified. It is an excellent option to every spa.

SALT SANITATION

Fresh Water Spa Sanitation System employs a sophisticated electrolysis process to generate a pristine variant of chlorine from salt (NaCl) that effectively purifies your spa's water. Following the transformation of salt into chlorine, the system neutralizes all harmful bacteria present, and the chlorine subsequently reverts to salt, perpetuating this remarkable cycle. Notably, the salt concentration employed is exceedingly minimal, even less than that found in a human teardrop.

Easy to Use

- Conveniently located by your Smart Spa Control Center™
- Simply set the desired chlorine level with the touch of a button
- Automatically generates the appropriate amount of sanitizer
- Spend more time enjoying your spa than maintaining it!

Clean & Natural

- Salt Sanitation produces clean, clear, silky-smooth water that's luxuriously soft
- Salt Sanitation provides a more natural-feeling water with no itchy, dry skin or eyes
- Salt Sanitation is a natural sanitation method, in contrast to using harsh chemical chlorine
- Salt Sanitation offers a pleasant healthful spa experience eliminating the harsh chemical odor

EQUIPMENT

While some tubs may only have an on/off switch, Crystal Cove Spas goes beyond that by incorporating a dynamic and unmatched hydro-therapeutic experience into each design. Our tubs feature low-speed settings ideal for filtration and relaxation, as well as high-speed settings that provide a soothing and invigorating pressurized massage, offering great relief to tired muscles and joints. Additionally, our hot tubs efficiently reach luxurious temperatures with the help of our advanced 5.5 kW Titanium heaters. These heaters guarantee consistent and reliable heating performance for years to come.

TP500

Eliminator™ Power Frame Pump

This high-performance pump efficiently circulates and filters your spa's relaxing waters on low speed while delivering unmatched performance and durability on high speed. It's just one of the ways Crystal Cove Spas delivers both relaxing comfort and tough love to whatever ails you.

Quiet Clean™ 100% Filtration System

Available as an optional feature across our entire line of tubs, the Quiet Clean™ 100% Filtration System is comprised of a 24-hour circulating pump that constantly and quietly heats the water, so your luxurious home spa is always ready to comfort you whenever you need it. The Quiet Clean™ system can help reduce energy costs by minimizing pump operation when your tub isn't being used.

Whisper Power Unit™

All the fantastic features offered by a Crystal Cove Spas hot tub are easily managed by large, easy-to-read, full-color digital control panels that operate everything from pumps, lighting, and heaters - all with the simple touch of a button. Spending less time fussing with unintuitive controls means more time relaxing in the swirling waters of your home spa.

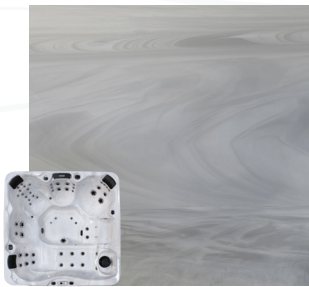

WhisperHot™ Titanium Heater

Crystal Cove Spas remains committed to innovation, which is why we're proud to offer our custom-developed WhisperHot™ Titanium Heater across our entire spa line. While the warm and enveloping waters of your spa might feel like they're geothermally heated, titanium is the key to the soothing warm water. Even with today's salt sanitizing systems, no other material improves heater longevity like titanium. Titanium contains no iron, so it never rusts or corrodes.

SPA COLORS

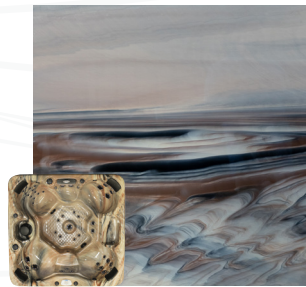

At Crystal Cove Spas, you have a wide range of options to customize your hot tub to your personal taste and style. Our alluring selection of acrylic shell colors allows you to choose the perfect color to complement your home resort and match your individual style.
